### Highlighting:

- Alternative Fuel Safety and Economy
- Fleet and Transportation Projects
- Propane AutoGas for Schools & Fleet
- Direct uses of Natural Gas
- Compressed Natural Gas (CNG) Vehicles
- Electric Vehicles (EVs)
- Fleet Fueling Infrastructure
- EV Charging Technology
- State & Federal Energy Policy & Rebates
- Georgia's Clean Energy Future

### A 2-hour Seminar and Commercial Vehicle Display:

Map your sustainability and economic development plan using natural gas, electric (EV) and propane AutoGas vehicles. Public Service Commissioner Tim Echols hosts a guided, walking showcase of alt-fuel cars, trucks and buses followed by a seminar on current trends in alternative fuel vehicle technology, transportation, energy security and resilience, for rural and urban communities. Technology Association of Georgia and Clean Cities Georgia highlight their work building a clean tech future. Schedule a commercial fleet test drive with OEM reps.

**Cost to attend: Free**

### Attendees:

Mayors, City & County Administrators, Energy Managers, Public Works Directors, Fleet Managers, Shop Foremen, Business and Manufacturing Execs, Sustainability Officers, Technology Officers and others.

### Learning Objectives:

- Understand the growth trends in electric, propane and natural gas uses in transportation.
- How to evaluate each option relative to your needs and uses (fuel fit).
- Where to turn for additional resources and advice on funding and project implementation.
