With funding from the EPA's Clean School Bus Program, K12 schools can select Blue Bird Vision Electric or Propane autogas 

buses.

Club Car, an iconic golf cart producer, showcases the Club Car Urban XR, its latest street-legal electric vehicle; a mini pickup with a dump truck bed for conveniently hauling and dumping payloads with several other cargo options.

At each stop, **Georgia PSC Commissioner Tim Echols** leads key industry suppliers in fast-paced panel discussions highlighting the benefits of clean fuels for municipal and commercial fleet operators. There will be an accompanying outdoor showcase of electric, hydrogen and near-zero alt-fuel vehicles, leading off with the **Club Car Urban mini-pickup**, Workhorse EV trucks from **Electric Commercial Vehicles** and the new **KIA EV9** now being manufactured in West Point, GA. **Georgia Power** will detail their programs, services and rates to support their customer's growing network of workplace and public EV charging units and the new jobs created by electrification. **Atlanta Regional Commission** (Austell, Alpharetta) will review the growth in Georgia's clean transportation network and economic development. **Blue Bird**, **Yancey Bus**, **Alliance Autogas**, EPA, and **Clean Cities Georgia** will cover the essentials for **Clean School Bus funding** for EV and **propane buses** and their related fueling/charging infrastructure build-outs. **Atlanta Gas Light**, **Municipal Gas Authority of Georgia** and **Cummins** will review the essential benefits of **renewable natural gas** (RNG/CNG) for medium and heavy-duty vehicles, like refuse haulers and OTR trucks. **Yamaha Motor Corporation**, U.S.A. will showcase the world's first hydrogen-powered golf car and a G3 boat utilizing sustainable marine fuel. **Qcells**, building multi-billion-dollar solar cell and modular plants in Dalton and Cartersville will highlight their progress as the host sponsor of the Savoy Automotive Museum stop on July 10th.

With billions in federal funding available for clean fueling and infrastructure, and a state that is leading the way in EV automotive manufacturing and supply chain, the **Georgia Clean Energy Roadshow** provides audiences with the necessary connections and technical resources to become energy efficient and energy

resilient.

The Clean Energy Roadshow is the longest running mobile educational series for fleets in Georgia. Each Roadshow stop runs the same agenda. Registration is required but is free to fleets and government attendees. For more information visit [www.CleanEnergyRoadshow.com](http://www.CleanEnergyRoadshow.com)
